Dear Dr. Monk,

Thank you for letting me know the situation with the data and code. I also want to thank you for taking the time to reach out me I really appreciate it.

Best,
Alisha

Subject: RE: Data and code request

Dear Alisha,

As it turns out the version of the National Survey of American Life survey that I used for this paper had restricted-access variables. Consequently, I am not authorized to send the data set. I applied to use this data set back when I was a grad student at UC Berkeley and had to wait to receive the restricted-access version of the data set. This involved setting up a data protection plan too. If you remain interested in pursuing your project, then after you gain access, I will certainly help you with coding.

Thanks for reaching out

Subject: Data and code request

Hello Dr. Monk,

My name is Alisha Jones and I am a Sociology PhD student at the University of California, Merced.

In my statistics course we are working on data collection and replications for our research projects. We have been asked to find an article of interest to our own work and ask the author for their data and code.

I am interested in your article, The Color of punishment: African Americans, skin tone, and the criminal justice system.

I wanted to ask if you would be able to share your replication code and your data for this project. These items will only be used for educational purposes.

I look forward to hearing back from you.

Best,
Alisha
