Hello Dr. Uzogara,

Yes I wanted to use the same variables and code as the ones in your particular study. Thank you for letting me know the situation with the data and code. I also want to thank you so much for taking the time to reach out to me I appreciate it.

Best,
Alisha

Subject: Re: Data and code request

Hello Alisha,

I haven't used the NSAL dataset in almost 4 years and at this point I'm not sure which specific flash drive that information was possibly stored in.

Out of curiosity, are you planning on using the public-use NSAL? I used the NSAL version that required special permission from the PRBA at ISR. That version included restricted information such as the interviewers' age, gender, race and other variables. Those variables are unavailable in the public version in case you want access to the full questions.

Cheers,
EU

Subject: Data and code request

Hello Dr. Uzogara,

My name is Alisha Jones and I am a Sociology PhD student at the University of California, Merced.

In my statistics course we are working on data collection and replications for our research projects. We have been asked to find an article of interest to our own work and ask the author for their data and code.

I am interested in your article, Perceived Skin Tone Discrimination Across Contexts: African American Women' s Reports.

I wanted to ask if you would be able to share your replication code and your data for this project. These items will only be used for educational purposes.

I look forward to hearing back from you.

Best,
Alisha
